

# JSON

The screenshot shows a web browser with several tabs. The developer console is open, displaying a JSON object. The JSON structure is as follows:

```
{  "dJSON": [    {      "response": [        {          "body": [            {              "totalCount": 743,              "items": [                {                  "pageNo": 1,                  "numOfRows": 10                }              ],              "header": [                {                  "resultMsg": "NORMAL_CODE",                  "resultCode": "00"                }              ]            }          ]        }      ]    }  ]}
```

Name	Type	Value
dJSON	list [1]	List of length 1
response	list [2]	List of length 2
body	list [4]	List of length 4
totalCount	integer [1]	743
items	list [10 x 18] [53: dataframe]	A dataframe with 10 rows and 18 columns
pageNo	integer [1]	1
numOfRows	integer [1]	10
header	list [2]	List of length 2
resultMsg	character [1]	'NORMAL_CODE'
resultCode	character [1]	'00'
